

Department of Health
Emergency Preparedness Graduate Certificate

Student Learning Outcomes

Student Learning Outcome #1	Students will demonstrate fundamental knowledge about environmental health concepts and practice and how emergency preparedness is related to environmental health and public health
Student Learning Outcome #2	Students will demonstrate their information literacy by accessing, processing, comprehending, and evaluating specific information about an environmental disease agent and communicating that information under simulated crisis conditions.
Student Learning Outcome #3	Students will demonstrate their competence in the skills needed to assist communities and organizations plan for, mitigate, respond to and recover from emergencies
