ENDNOTES: Comparative analyses between two periods of external grants activities: July 1, 2006 –March 31, 2007 & July 1, 2007 – March 31, 2008.

Further analyses of the Table above revealed the following:

During the period from July 1, 2006 to March 31, 2007, the distribution of funded proposals ranged from a minimum amount of \$1,500 to a maximum of \$574,000. Additionally, roughly 37% of all the submitted proposals were not funded.

During the period from July 1, 2007 to March 31, 2008, the distribution of funded proposals ranged from a minimum amount of \$400 to a maximum amount of \$1,329,252. Additionally, roughly 8% of all the submitted proposals were not funded.

Caution must be exercised in interpreting the reported grant productivity indices because OSRFD is still awaiting the outcomes of the pending proposals that were submitted during the identified comparative time periods.

The WCU *Sponsored Research Quarterly* is published 4 times a year: October (number one), January (number two), April (number three), and a comprehensive Final Report in July (number four).

The WCU *Sponsored Research Quarterly* is an internal publication of the Office of Sponsored Research and Faculty Development (OSRFD).
