

## COMMUNICATION SCIENCES AND DISORDERS

The department's goal is to provide you, as a student, with a firm theoretical foundation in the processes of normal communication, an understanding of the disorders that frequently impair normal communication, the theoretical information concerning the evaluation and remediation of communicative disorders, and an opportunity to implement theory in closely supervised clinical practice.

Furthermore, the department strives to develop you as a professional who is broadly educated and who possesses the ability to think analytically, critically, and in a manner that allows you to excel at problem solving. We also seek to promote your development as a competent provider of clinical services.

We hope to instill in you an appreciation for life-long learning and personal development along with a positive sense of self-worth. As a result, you should acquire a respect for the quality of life, individual and cultural differences, and ethical behavior.

### Career Opportunities

In keeping with the objectives and standards of the American Speech–Language–Hearing Association (ASHA), graduates of the bachelor of arts program who do not immediately pursue advanced studies are qualified for employment in related health fields. To be employed as a speech-language pathologist, you must have a master's degree or doctorate.

Completion of the B.A. degree program prepares you to pursue graduate study that will fulfill the requirements for a Certificate of Clinical Competence (CCC) from ASHA or graduate study in a related science or communication field. The majority of our master's degree students are offered professional positions before they graduate.

Graduates have been accepted for admission to advanced degree programs at the following colleges and universities:

Boston University  
Columbia University

James Madison University  
Pennsylvania State University  
Temple University  
University of Colorado  
University of Iowa  
University of Wisconsin

### Undergraduate Degree

**Bachelor of Arts in Communicative Disorders.** This preprofessional degree program provides you with a basic knowledge of human communication and communication disorders in preparation for graduate study in audiology, speech-language pathology, speech and hearing science, or related health science or communication fields.

### Special Study Opportunities

The Department of Communication Sciences and Disorders is an active participant in the National Student Exchange Program.

### Typical Courses

Anatomy of Speech and Hearing Mechanisms  
Articulation and Phonological Disorders  
Fluency and Voice Disorders  
Hearing Disorders  
Language Disorders  
Speech and Hearing Science  
Speech and Language Development

### Facilities

The facility in which the Department of Communication Sciences and Disorders is housed contains departmental offices, a reading room, a distance learning classroom, computer/speech science laboratory, and the West Chester University Speech and Hearing Clinic. The clinic comprises therapy rooms with observation capability, clinician work areas, an audiological test suite, and a client conference room.

The department operates the Speech and Hearing Clinic as a teaching and training facility. The clinic provides diagnostic and therapeutic services for children

## About West Chester University

A comprehensive, public institution, West Chester University offers high-quality undergraduate and graduate degree programs in more than 100 subject areas, as well as certification and certificate programs. As one of the largest members of the Pennsylvania State System of Higher Education, West Chester offers a full and rewarding educational experience as well as reasonable tuition.

With a rich heritage dating back to the 19th century, West Chester University was founded in 1871 as West Chester Normal School for the purpose of training teachers for the Commonwealth's newly established public schools. In 1960, West Chester State Teachers College expanded its programs to include liberal arts and graduate degrees and, as a result, dropped "Teachers" from its name. In 1983, West Chester State College became one of the 14 institutions in the State System of Higher Education. Along with its university status, the school acquired a new system of governance and the opportunity to expand its degree programs.

Today, more than 15,400 graduate and undergraduate students, along with 1,500 faculty and staff, study and work on the 406-acre campus. Situated in the Borough of West Chester, the campus is a picturesque mix of Gothic, Victorian, and modern architecture with pleasant, tree-shaded walks.

Strategically located at the center of the mid-Atlantic corridor between New York City and Washington, D.C., West Chester is just 25 miles west of Philadelphia and 17 miles north of Wilmington.
