

Tips for using this workbook

1. The order of the worksheets matches the order of the default user interface (UI). If you prefer, rearrange the worksheets so that the menus and toolbars that you use most often are on the leftmost side of the workbook.
2. The names of the worksheet tabs match the menu and toolbar names in Word 2003.
3. To search for a specific command in this workbook, do one of the following:
 - In Excel 2003, on the **Edit** menu, click **Find**.
 - In Excel 2007, on the **Home** tab, in the **Editing** group, click **Find & Select**, and then click **Find**.
4. To print, do one of the following:
 - In Excel 2003, on the **File** menu, click **Print**. Under **Print what**, select an option to print the selection, the active sheet(s), or the entire workbook.
 - In Excel 2007, click the **Microsoft Office Button**  and then click **Print**. Under **Print what**, select an option to print the selection, the active sheet(s), or the entire workbook.
5. A command that is preceded by an asterisk (*) is available only when the language that uses the command has been enabled for editing text.
