

# AMERICAN STUDIES

American studies emerged as an academic movement shortly after World War II. With the United States becoming a world leader at a time when growing specialization was fragmenting knowledge and communication, many American scholars felt compelled to integrate information and insights from numerous sources in an effort to understand what was “American” about America.

The American studies program operates on the assumption that all aspects of America’s intellectual, artistic, and material culture are valuable sources of information and insights about American civilization. American studies is interdisciplinary in nature because it draws from a number of academic disciplines covering many facets of American civilization to understand American culture.
