# ChargePoint
## EV Charging

1. Open the electric charging port to the car by pushing the "fuel cap" button.

2. Tap the ChargePoint card against the reader symbol on the charging station.

→ *Station will beep to indicate the charger is ready to be used.*

3. Detach the charging cord from the station's socket and plug into vehicle.

→ *Nissan Leafs: Blue lights on dashboard will flash when EV vehicle is actively charging*

→ *Blue lights (3 bars) will be fully lit when vehicle is finished charging*

4. To end charging session, detach cord from vehicle and replace into charging station's socket.

→ ***Don't forget to remove your charging cord from your electric vehicle and take it with you.***
