Road Safety *Tips* for Driving at Night

1. Allow yourself more time to get to work.
2. Check your driving lights and signal lights regularly to make sure they are working and clear of obstructions.
3. Turn your headlights on as soon as the light begins to fade.
4. Use your low beams when you are following another vehicle or when a vehicle approaches from the opposite direction.
5. Look beyond your own headlights. Use streetlights and the lights of vehicles in front of you to be aware of what is happening down the road.
6. Leave an extra cushion of space around your vehicle at night, to allow more reaction time for yourself and other drivers.
7. Observe warnings of animal crossings. Animals are most likely to be active around roads in the early morning and early evening.
8. Stay cautious of impaired drivers.
9. If you have vehicle trouble, pull as far off the road as you can. Warn other drivers with your four-way flashers, headlights, interior lights and flares if you have them.
10. Walk carefully to and from your vehicle in well-lighted areas and stay alert.
