Clickers at WCU

The Top 5 Suggestions for Successful Use

1. Make time in class for your clickers. You will need to reorganize your class time to accommodate them!

2. Make sure your students understand the objective for using the clickers in your class and what you expect.

3. Be flexible when planning to use your clickers! Just like any other technology, things happen!

4. Award points in class for using the clickers- reward participation, but do not use only for attendance and quizzing

5. Keep your students attention! Space your clicker questions at 10-20 minute intervals to refocus your group.
