

To further the efforts of West Chester University's [Moon Shoot for Equity](#) and the College of the Sciences and Mathematics' [Center for STEM Inclusion](#), the dean's discretionary funds are being made widely available to the College to support projects that provide students with experiential, high-impact learning opportunities beyond the traditional classroom. The maximum award is \$6,000 per project, which can be used for a variety of purposes, as described below.

Important Dates

Deadline: Monday, September 11, 2023 at 11:59 PM.

All applications must be submitted as a single pdf file in [InfoReady](#). A confirmation email will be sent to the applicant and their chair after the submission has been received. Email submissions will not be accepted.

Award notifications will be sent to the applicant's WCU email address the week of September 24, 2023.

Funding must be used by June 9, 2024 without exception.

Program Purpose, Eligibility, and Scope

Purpose

Student Engagement Awards (SEA) fund projects that will support student success initiatives that are known to contribute towards closing equity gaps. This includes, but is not limited to, projects focused on institutional priorities such as increasing the graduation rate and/or improving retention of underrepresented students of color and other historically underserved populations including transfer students, non-traditional students, international students, veterans, etc.

Eligibility

Tenured or tenure-track regular faculty members with an appointment in the College of the Sciences and Mathematics are eligible to apply. Generally, students involved in the projects must be enrolled at WCU. However, projects involving high school students and prospective students will be considered, provided proposals are accompanied by endorsements from participating schools. Working with non-WCU entities and students may require additional consideration and planning. Priority will be given to proposals by applicants who have not received a grant from the dean's office in the previous year, probationary faculty members, and senior faculty members undertaking a major scholarly initiative.

Scope

SEA are made from discretionary funds available to the dean of the College of the Sciences and Mathematics. They are synchronized with the fiscal year. Use of funds must comply with relevant PASSHE policies.

The following is a list of activities that are eligible for funding. This list is meant to spark your thinking; it is not meant to be exhaustive or limiting. Propose your best ideas.

Specifically, SEA will fund the following budget items:

- Students attending a professional conference, creative workshop, etc.
- Students traveling to study with a renowned scholar, or to a center or site for research, community development, arts, etc.
- Students involved in study abroad program or course.
- Faculty professional development funds to design a high-impact learning experience for students.
- Faculty professional development funds to study/analyze an area of concern in a course, pedagogical approach, curriculum design, etc. related to student success.
- Stipends for students to participate in research projects or internships during the academic year or summer.
- Funds for equipment, supplies, or other materials* for a research or creative project that involves students.
- Creating bridges with area schools and community organizations.
- Collaborations between academic affairs, student affairs, and/or undergraduate services (e.g., student organizations, residence life, service learning, tutoring).
- Connecting students with alumni.
- Interdisciplinary research projects.

*These items may also be eligible for tech fee funds, so priority will be given to proposals for items not typically covered by tech fee. Tech fee applications are accepted through the CSM dean's office every spring.

Priority will be given to projects or activities that serve WCU students, especially underrepresented students of color and other historically underserved populations, including potentially underserved populations like transfer students, non-traditional students, international students, veterans, etc.

Team projects and/or proposals submitted jointly across various departments/programs are welcome.

PASSHE has implemented Tax Procedure 2015-6 – Reimbursements for Meals to Employees Who Are Not in Overnight Travel Status. This procedure is consistent with IRS regulations, which state that in order for meals that are reimbursed as travel expenses to be excluded from taxable compensation, employees must be traveling overnight and away from their tax home. (Tax home is the general area of work and not the employee's residence.) The application of this policy means that meal expense reimbursements will be paid via payroll rather than accounts payable and taxed as compensation when the employee is not in overnight travel status. For example, if an employee travels to a sampling site for one day, the cost of the lunch is considered taxable and will be paid to the employee via payroll.

Reporting and Other Requirements

Grant recipients must submit a 2–3-page final report indicating how well the experience accomplished your intended goals. Reports can include a teacher/supervisor evaluation of students' achievements of proposed outcomes, performances on any assignments or activities related to outcomes, student feedback about their learning and experiences, evidence of participation and other details regarding programmatic success.

Reports must be submitted within 3 months of completing the project. Failure to submit a report will make grant recipient ineligible for other CSM grants.

Grant recipients agree to serve as mentors to any CSM faculty members who may request guidance during the SEA application process in subsequent years.

Following completion of their project, grant recipients agree to promote their research via a short video interview/demonstration, recorded by a CSM Student Ambassador and shared on the College's website and social media platforms.

Application Guidelines

Submit your proposal and necessary documents through [InfoReady](#).

The SEA program provides an opportunity for faculty to gain valuable experience preparing grant proposals that will be peer-reviewed. Receipt of a Student Engagement Award is a scholarly product that carries merit in the teacher-scholar models of many departments and by tenure and promotion committees. Therefore, the quality of the applications is expected to be commensurate with professional and academic standards. The application for a Student Engagement Award must consist of the following materials:

1. **Narrative Description.** 4 pages, single-spaced, 12-pt font. Narrative description of the proposed project that contains the components listed below must be provided. The parts of the proposal should be labeled, using the topics below as section headings. The evaluation of the proposal will be based, in part, on how the narrative description addresses these topics.
 - a. **Project Title and Applicant's Name.** As a cover sheet is no longer required, please include the project title and applicant's name on the first page of the proposal, ideally in the header.
 - b. **Purpose and Significance.** Project purpose, description, and rationale. Describe the purpose of the project, the student learning and experiential outcomes that will be met by this project, and the educational/experiential opportunities students will be provided so they can meet the outcomes.
 - What activities will create the context for this learning?
 - How will you know when/that students have learned what you intended?
 - What artifacts or evidence will you collect in order to confirm their learning?

- c. **Likelihood of Success in Meeting Student Needs and Institutional Goals.** Indicate the likelihood of the project to successfully engage students in opportunities that will help them achieve the outcomes. Explain how the project supports recruitment and retention efforts and/or other benefits to the College or University.
2. **Budget.** 1 page. Budget components must be itemized as specifically as possible, and expenses must be based on research about relevant costs (e.g., current published airfare and other costs, state per diem rates, equipment costs, maintenance plans, hours and wage for workers, etc.). Consultation with the department chair and/or dean's office is recommended. A justification for each item must be provided, explaining why the item is needed to complete the project. If certain items or expenses could be covered through other funding streams (e.g., tech fee, department travel budget, startup funds), please justify the cost to SEA. The funds will not be available for use until you have connected (over email, Zoom, phone, or face-to-face) with [Rebecca Grisillo](#) of the CSM dean's office for your pre-award meeting. No purchases will be made until this has occurred and no reimbursements will be processed if this connection has not happened.
 3. **Résumé.** 2 pages. Please include relevant qualifications, experience, publications, and applicable research grants.
 4. **Letter of Support.** If relevant, include a letter of support from any partner organization, department, program, division, etc.

Faculty Mentors

The following CSM faculty members are recent SEA recipients who have kindly agreed to serve as mentors to any applicants who would like guidance with proposal preparation or the SEA submission process. Mentor contact information is provided below:

Peter Loedel, Ph.D.
 Dept. of Political Science
 BPM Center 557
 610-436-2743
PLoedel@wcupa.edu

Liu Cui, Ph.D.
 Dept. of Computer Science
 UNA140
 610-430-4960
LCui@wcupa.edu

Stevie Grasseti, Ph.D.
 Dept. of Psychology
 Wayne Hall 514
 610-436-2751
SGrasseti@wcupa.edu

Evaluation & Rubric

Evaluation

SEA applications will be evaluated by the CSM Faculty Proposal Review Committee (CSMFPRC) on the quality of the project proposed and the quality of the proposal submitted. Be advised that it can be difficult to evaluate the quality of the project if the proposal is not written in a manner that clearly addresses all of the components required in the narrative description. Below is the rubric that will be used to evaluate the proposal and the project. The rubric corresponds directly with the SEA guidelines, and applicants are encouraged to use it as a guide as they prepare their proposal.

Evaluators will score each proposal in the following categories as excellent, very good, good, fair, or poor. The proposals and ratings will therein be discussed in a panel.

Based on the scores and discussion during the panel, evaluators will then place the proposal in one of the three categories:

- Highly Competitive
- Competitive
- Not Competitive

The recommendations of the CSMFPRC will be taken into consideration by the dean, who will make the final decision on the awards to be made.

Rubric

Item	E 5	VG 4	G 3	F 2	P 1
Adherence to Guidelines. The InfoReady submission is filled out completely and correctly and the chair's email has been included to ensure that the chair has been notified. The proposal includes all of the components required. Page limits are within guidelines: 4-page narrative; 2-page résumé, 1-page budget.					
Project Narrative. The narrative clearly describes the student learning outcomes, how the activities will be carried out to achieve the outcomes, assessment plan involves direct assessment measures, and how the project meets the institutional goals of the University. The proposal can be easily understood by a colleague who is not an expert in the field.					
Budget. The budget components are itemized specifically, and expenses are based on informed estimates that have been appropriately researched. A budget justification for each item is provided, explaining why the item is needed to complete the project.					
Overall Project. The project will advance the opportunities available to the students with experiential, high-impact learning opportunities.					
Total					

E = Excellent VG = Very Good G = Good F = Fair P = Poor
