

Applied Statistics Elective Course

# STA537: Advanced SAS Programming

WINTER SESSION 2021/2022

Course will be limited to 20 students based on order of registration. It will fulfill an elective requirement (3 credits) for both the MS and Certificate Programs.

The course will be taught in online, asynchronous format. The course will be co-taught by Dr. Gallop and Dr. Rieger.

This course will focus on skills and techniques considered essential to advanced SAS programming. The primary topics covered will be SAS SQL and SAS Macro Programming. Other advanced topics will also be covered. Syllabus is available on the Applied Statistics website.

**Schedule:** The class will run from January 3 to January 23. Students will also be required to attend seminars on December 18 and January 15.
