

COLLEGE OF HEALTH SCIENCES

Dean: Dr. Ray Zetts

Communicative Sciences and Disorders: Dr. Michael Weiss, Chair

**Dr. Mindy Brudereck, Department of Communicative Sciences and Disorders**

- Dr. Brudereck is a great professor whose broad knowledge base is apparent to all of those with the opportunity to learn from her. Although she is in the field of Audiology, and the majority of students in our major want to become speech pathologists, she keeps the class content relatable to all. Her examples and explanations are always clear, and she is good at making complex ideas easy to understand.

Just by sitting in class, you can tell how much she appreciates and enjoys her profession. Until now, all of our classes have been focused on speech, yet Dr. Brudereck introduces the hearing mechanisms to her class in a way that makes you want to learn more about it. She uses her class time efficiently, but also makes herself available to answer any questions her students may have. I have thoroughly enjoyed her class thus far, and am excited about the rest of the semester.

**Dr. Sojung Kim, Department of Communicative Sciences and Disorders**

- Dr. Kim deserves to be recognized as an Outstanding Faculty member because of the dedication she displays to her students and her facilitative teaching method. I had the pleasure of taking an Anatomy for Speech and Hearing Mechanisms class with Dr. Kim, and her love for anatomy and utilizing that knowledge when correcting speech or swallowing disorders was contagious. Because of Dr. Kim I am considering taking a clinical and medical path with my major. Dr. Kim is very uplifting and always willing to support your decisions and ideas. During class she was thankful when someone asked a question. This showed how much she valued our input as students and I felt much more comfortable playing an active role in my learning process. I am so thankful to have had Dr. Kim as a professor!

Kinesiology: Dr. Frank Fry, Chair

**Dr. John Helion, Department of Kinesiology**

- Although I do not have class with Dr. Helion this semester, I can attest to his genuine care for each and every student that he teaches. Dr. Helion makes himself available during office hours for anyone to come and talk to him. His sincere, compassionate personality is undeniable and I know that he would do anything in his power to help his students, former and current. I strongly believe that a professor's work should extend outside of the classroom, and Dr. Helion is exemplary of this.
